Sint Pakjeshuis

Sint en Pieten

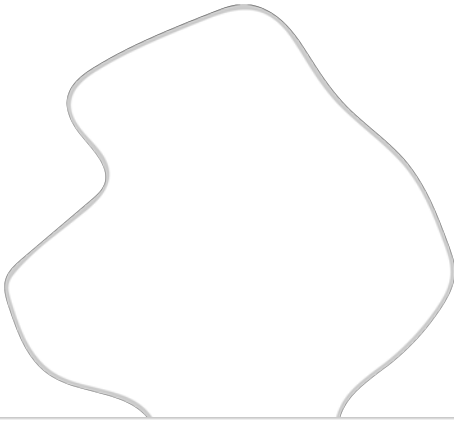

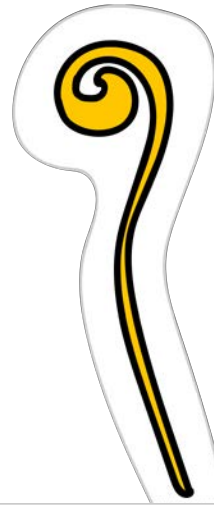

Knip Sint en de Pieten uit op de grijze omtreklijn. Je kunt een ring maken van het onderste vlakje en zo met Sint, de Pieten en de pakjes poppenkast spelen.

Wil je stokjes gebruiken, knip dan het vlakje af. Plak de stokjes zo dat de bovenkant uitsteekt boven de figuurtjes. Je kunt dan van boven af poppenkast spelen.

Extra luiken en ramen

Sint Pakjeshuis

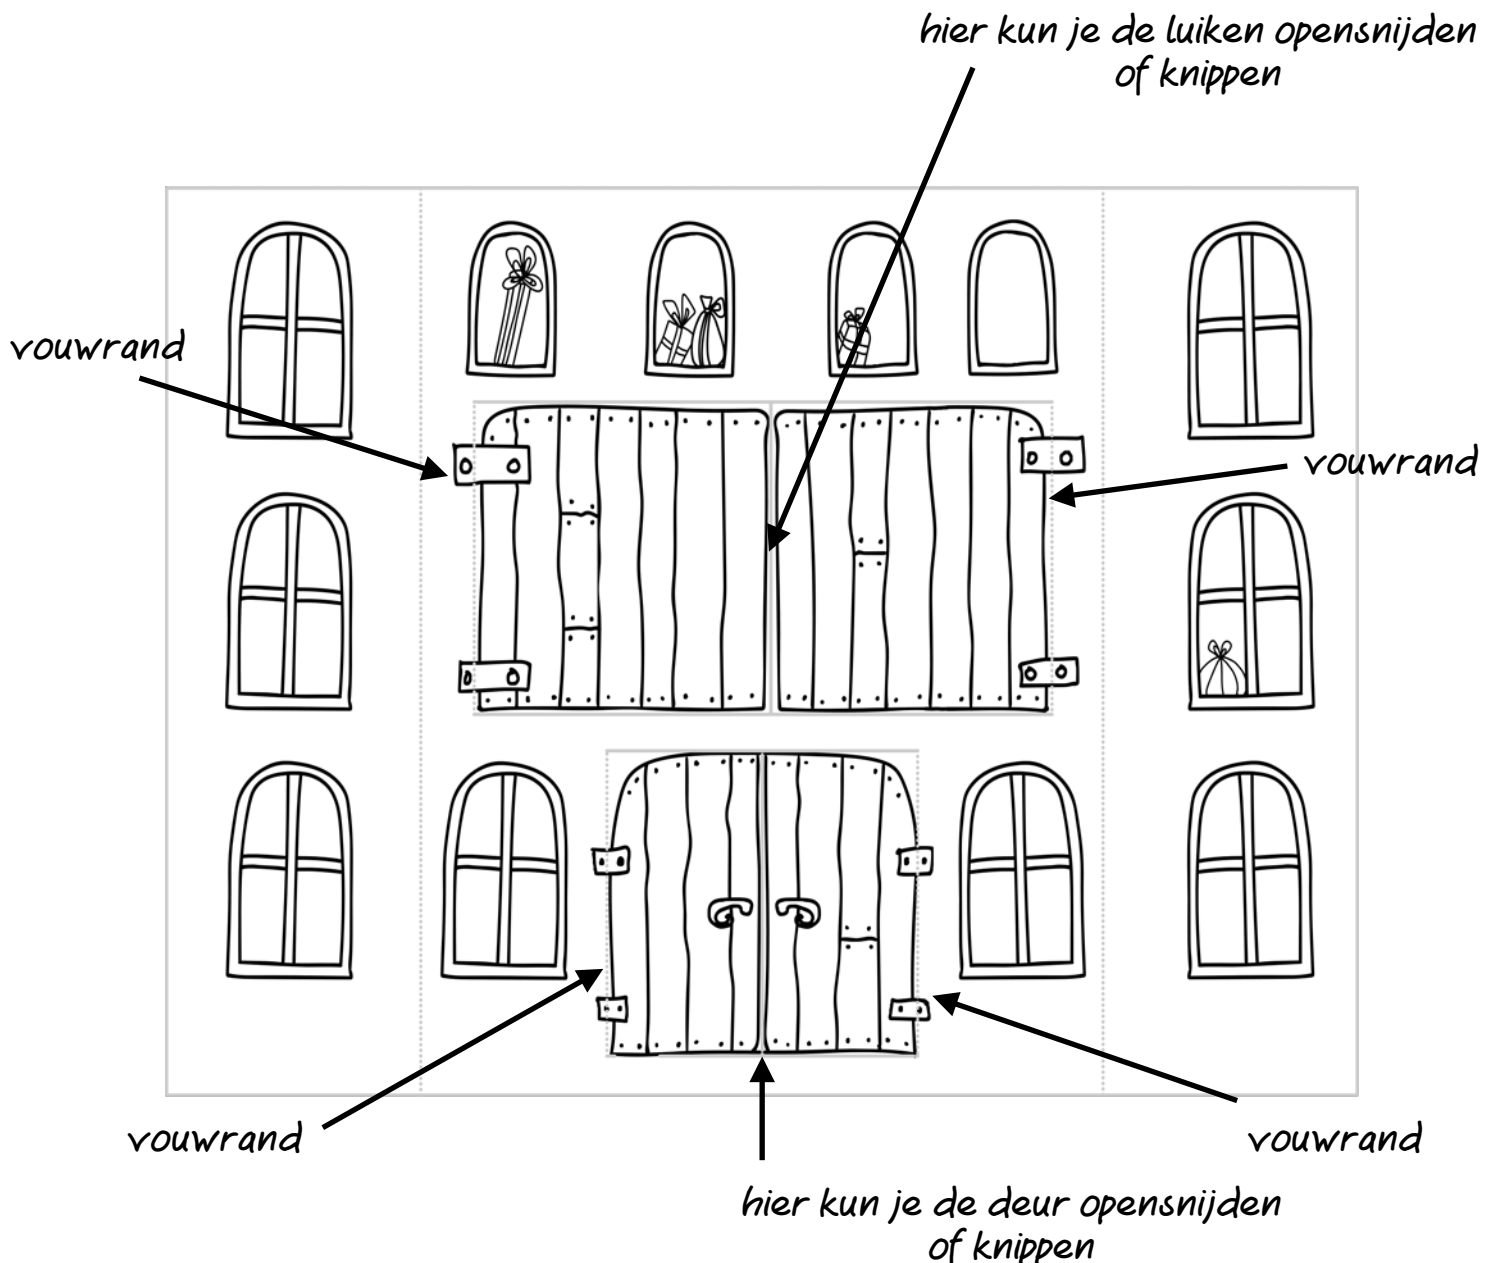

De deuren en de luiken kun je open knippen of snijden op de grijze lijnen.

De grijze stippellijnen zijn vouwlijnen.

Je kunt de zijmuren vouwen zodat het pakhuis als een poppenkastje kan staan. Je kunt ook het hele pakhuis op een doos plakken en dan de deuren en luiken openmaken.

Met de extra ramen en luiken kun je nog meer details aanbrengen.

Tip: gebruik plakband voor de stevigheid bij de vouwranden van de deuren en ramen.
